SENSATION-Y Series

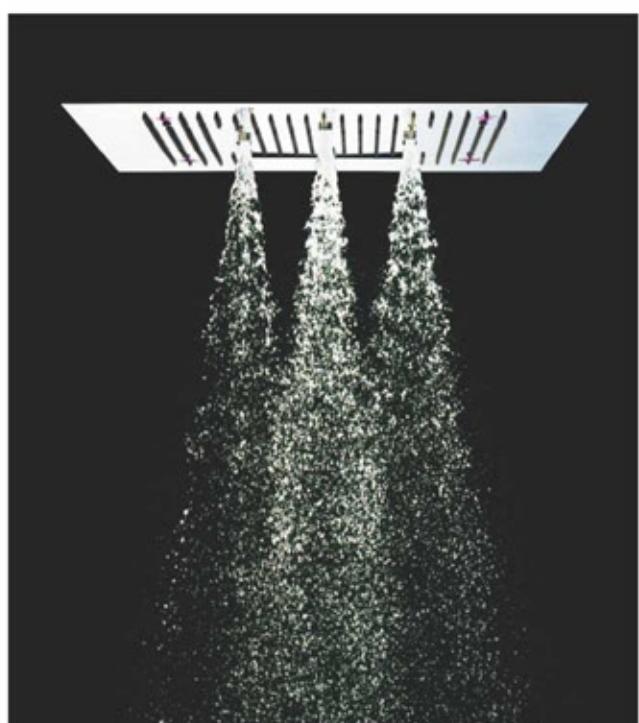

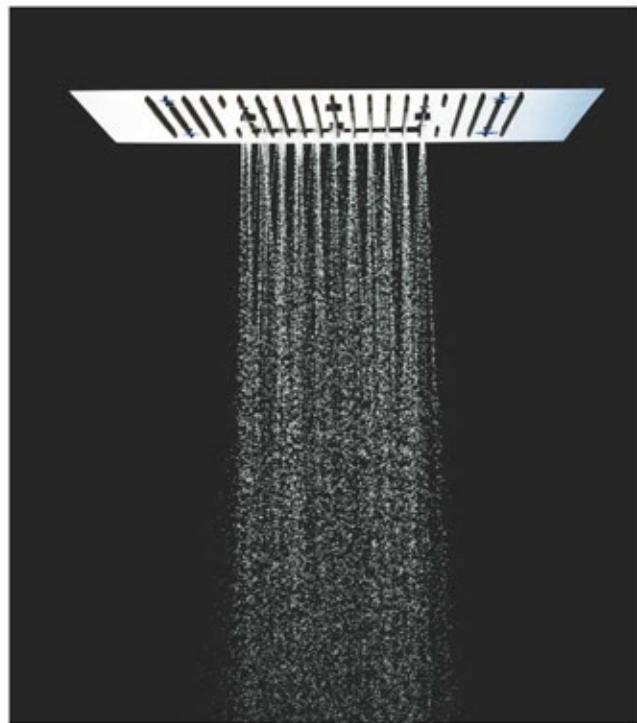

Chromotherapy is a natural therapeutic process with ancient origins, which uses color to help the body and mind find natural balance. Enjoying a color shower is much more than cleansing the body; the colorful rays radiate you for a given time, fusing the benefits of water with the properties of light and color.

In general warm colors such as yellow, orange and red are associated with energy, positivity, happiness whilst cool colors such as green, blue or purple inspire reflection, self-examination and calm.

MULTIFUNCTION SHOWER Series

Experience the natural power of water. The smooth showerhead, mounted flanking the wall, really stands out in the bathroom. It creates a sense of a completely new shower, with freedom of movement because of the two types of water streams. The pleasure of fine rain, the energy of multi-jet flow or even the comfort of an alluvial cascade which drops out of the shower as an authentic waterfall.

HIGH FLOW

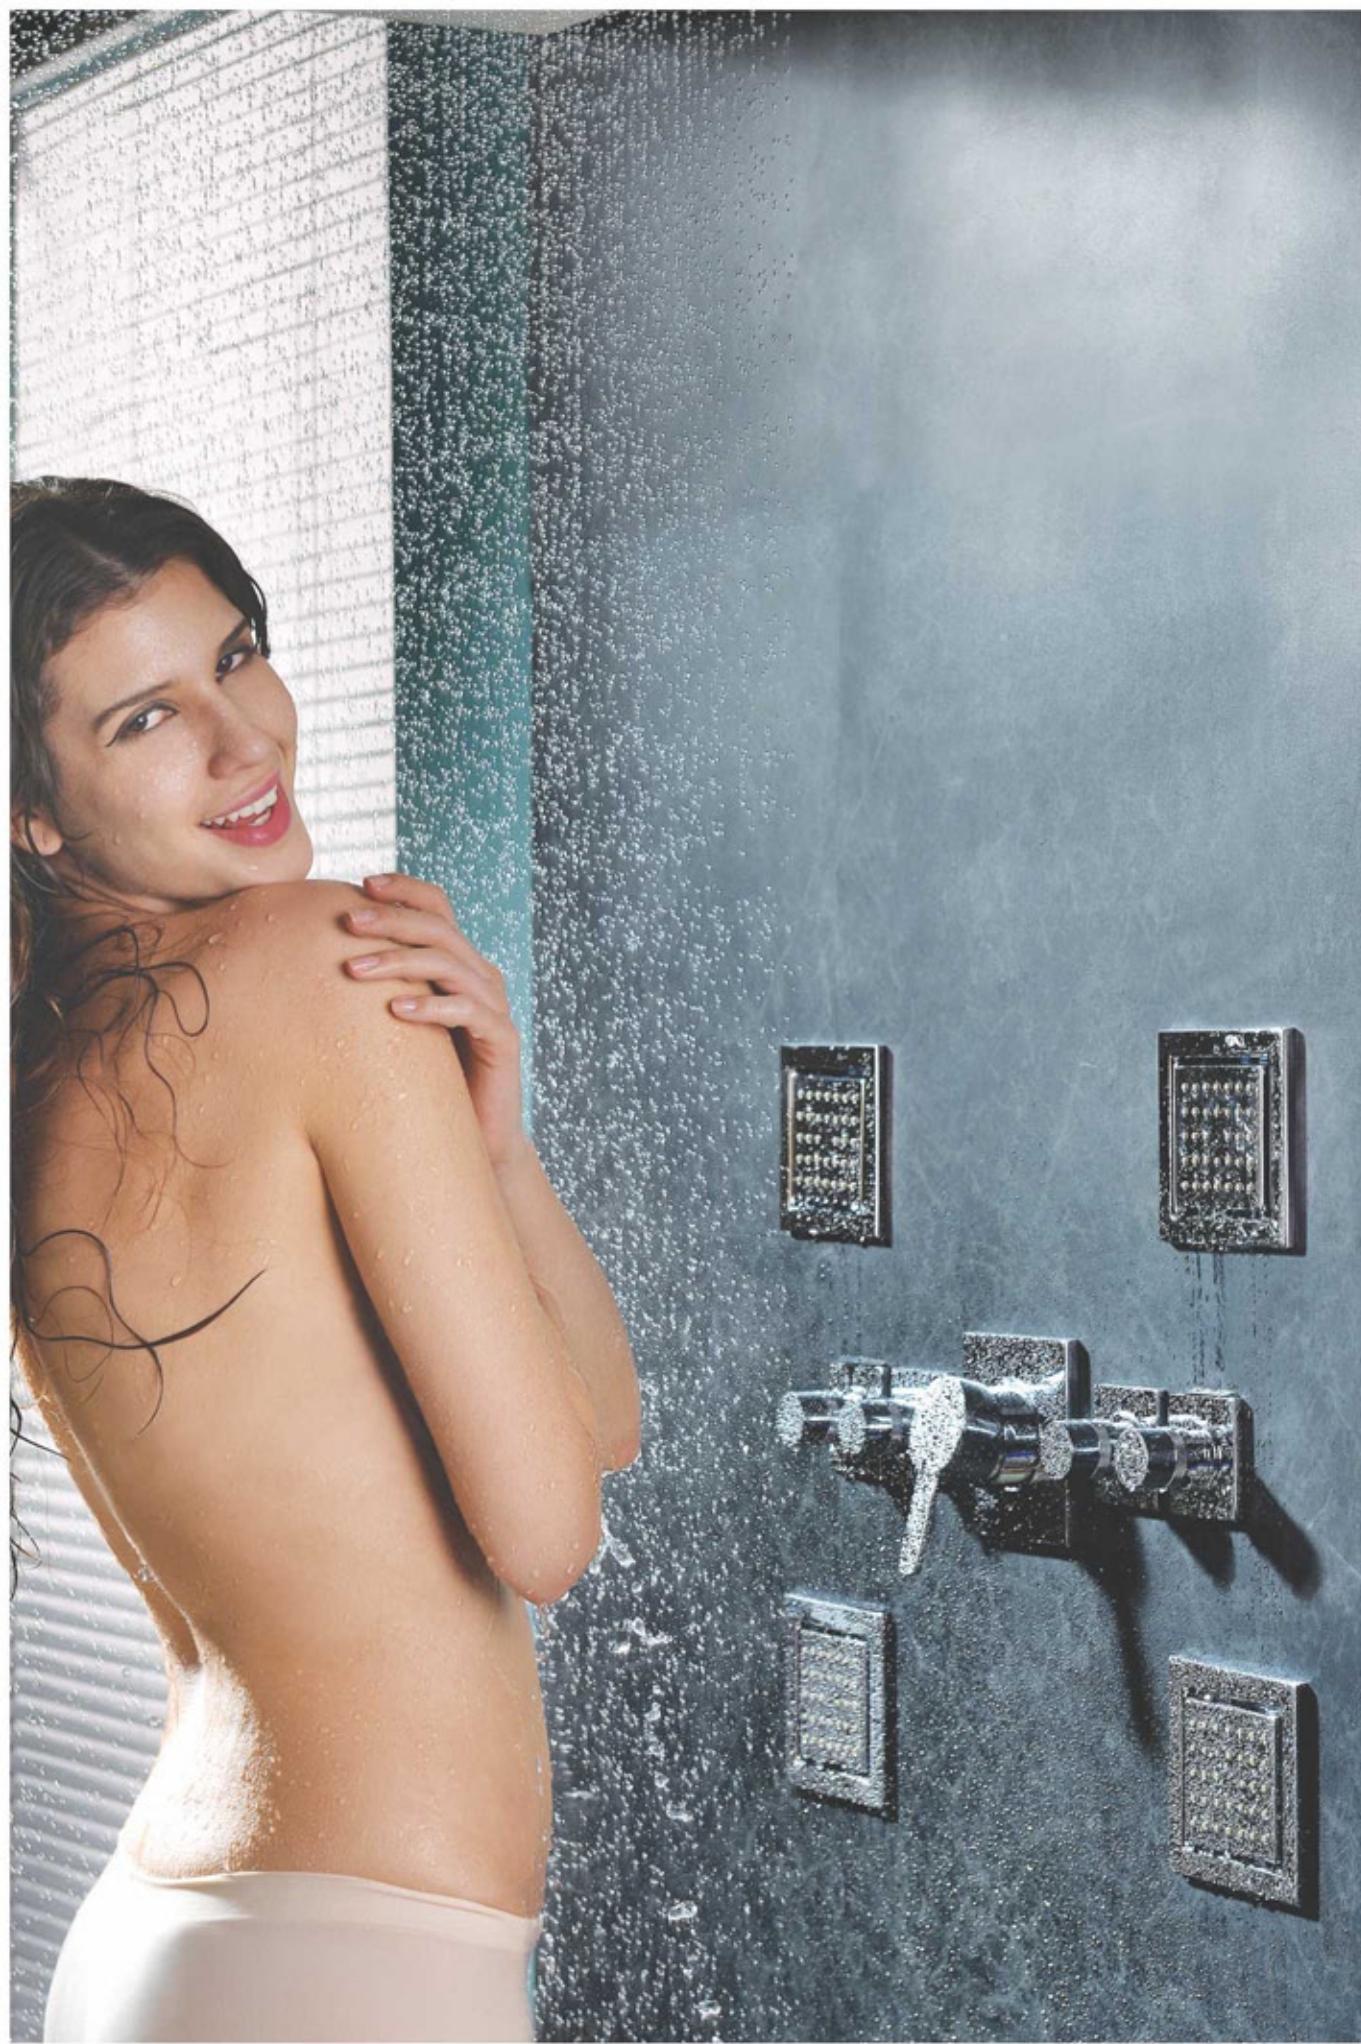

MULTI FUNCTION DIVERTER Series

Aquant conceived Shower Concepts with products designed to stimulate and improve the bathroom architecture, giving great importance to the creation of bathroom environments with a high value visual aesthetic integrity.

Multi-Function Diverters with 3/4" inlets provide a higher flow rate to meet the demand of several outlets. These Diverters can deliver enough water to run a showerhead, handshower and six body Jets at the same time at 5 Bar pressure.

RAIN SHOWER Series

The size of a showerhead is proportional to the pleasure experienced under the shower. The bigger the shower, the greater will be the rain shower experience. A more effective water distribution is achieved with equivalent water consumption, enveloping the entire body with water.

The variety of sizes grows up to an impressive shower of 500 mm, which lays the foundations of an entirely new product category.

Water + air = natural rain

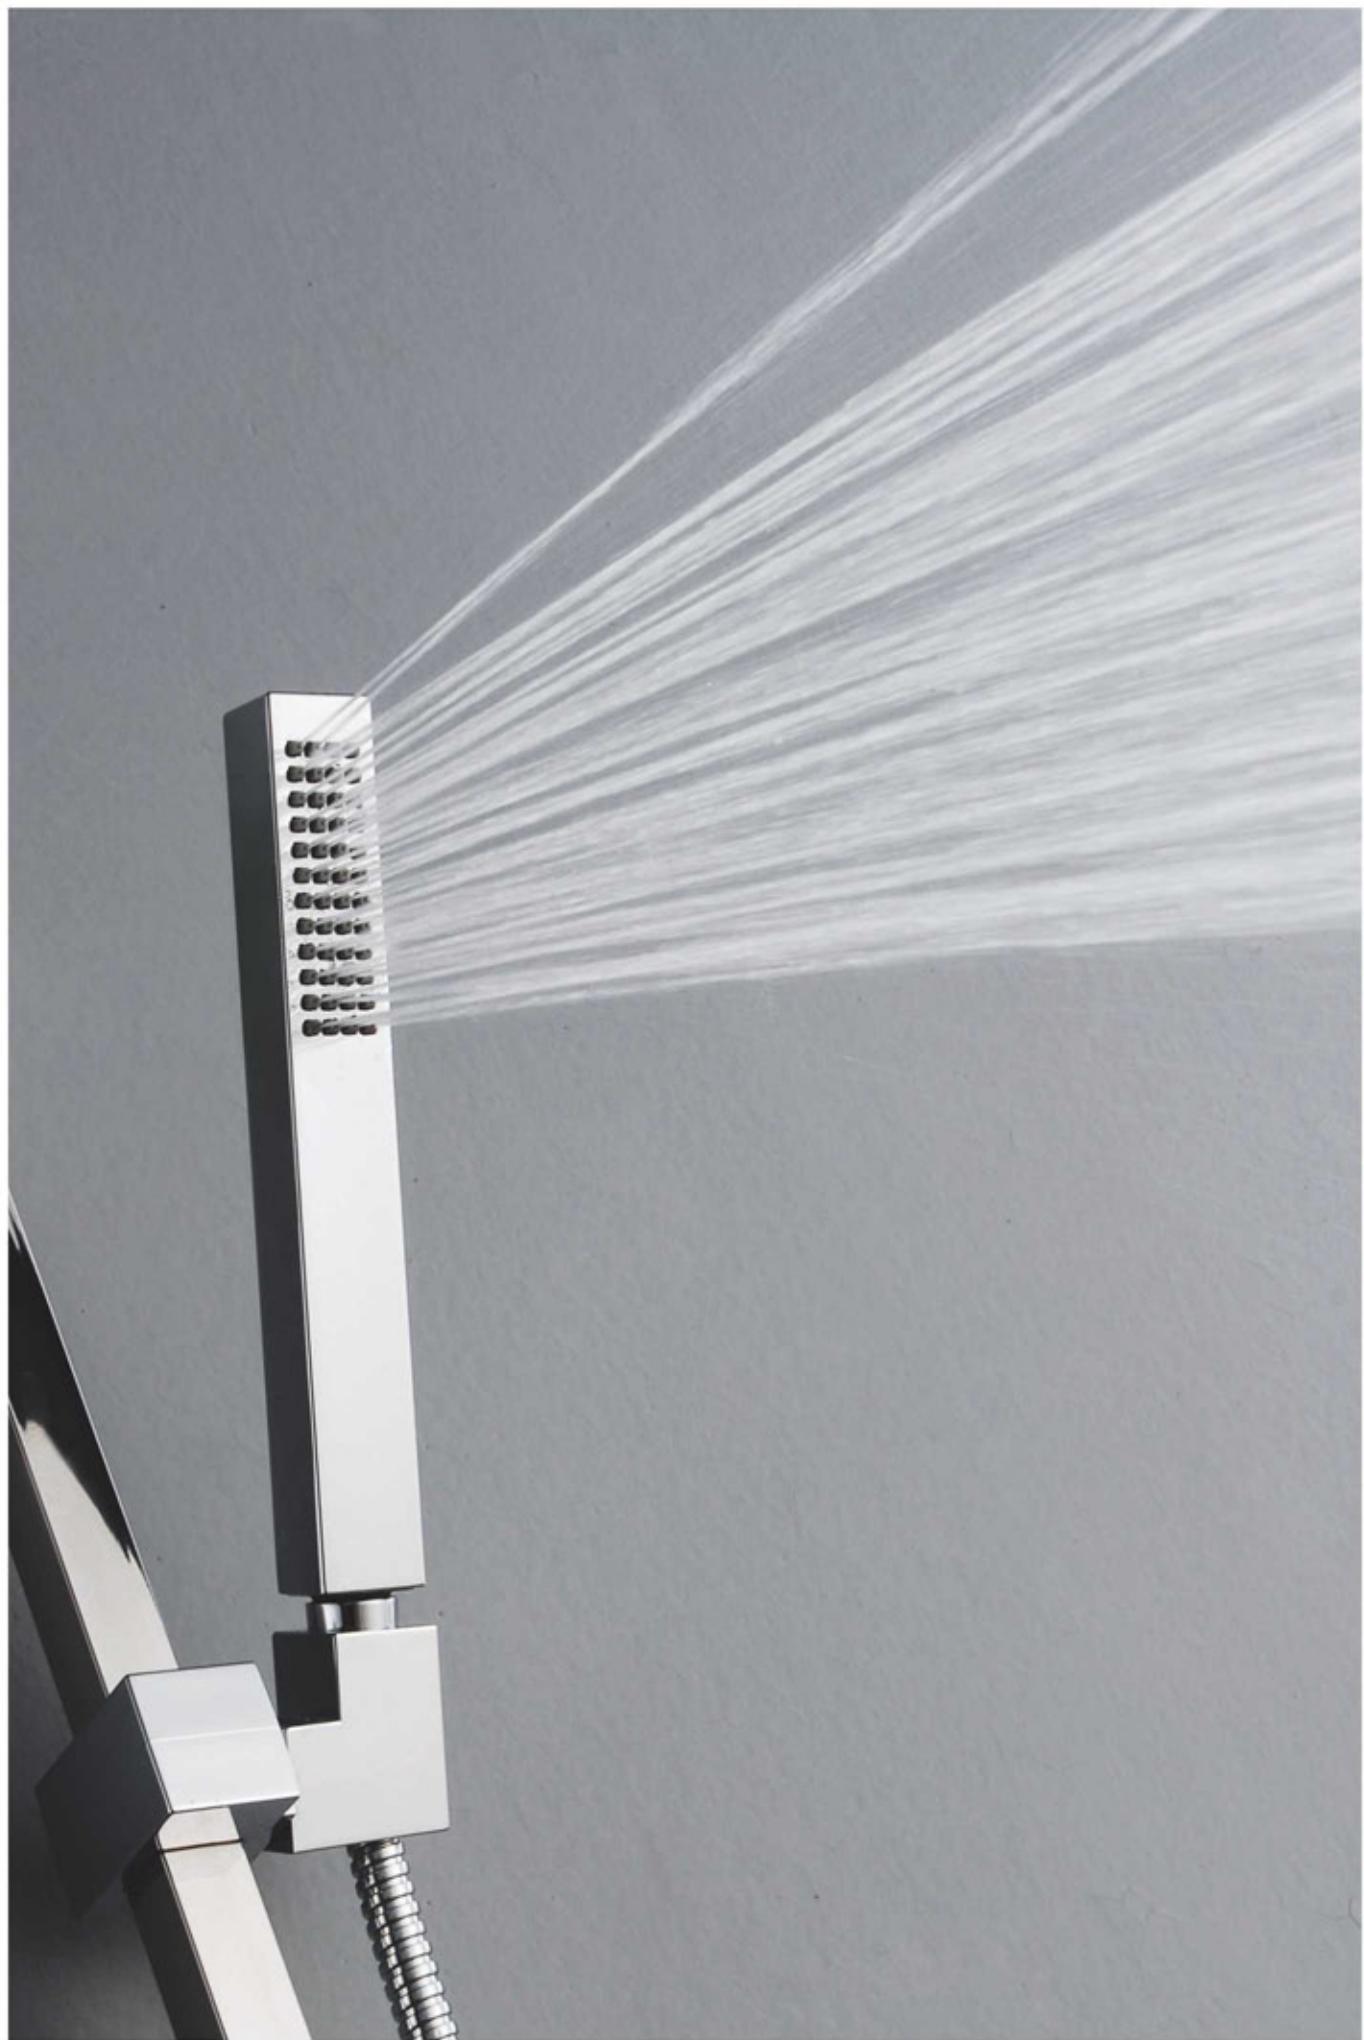

Natural rain was the mind set for the development of these innovative showers. Air is aspirated into the shower head and is mixed with water in a ratio of 3:1, to create a swirling effect. These air bubbles interrupt the solid water stream and generate millions of large water drops. You will experience the same effect of rain, calming and revitalizing.
